

## **Table of Contents**

**Page**

### **Chapter 1**

#### **Capture Introduction**

Overview .....	2
General Terminology .....	2
Getting Started.....	6
Creating a new project.....	8
Devices .....	11
Updating Symbols.....	13
Design Wide Objects .....	14
Modifying Objects .....	15
Creating Nets.....	16
Disconnecting Nets.....	18
Assigning properties to the diagram objects.....	19
Further functions within Capital Capture .....	19
Graphical Representation of objects .....	21
Style Sets.....	21
Multicores.....	22
Shield Terminations .....	23
Daisy Chained Multicores .....	24
Create a Symbol .....	27
Management of Symbol Libraries .....	30
Connectivity in symbols .....	31
Borders .....	32
Project export and Import .....	37
Device Transmittals .....	38

---

### **Chapter 1**

#### **Library Components**

Capital Systems Components Library Concepts .....	1
Overview .....	1
Library Data Classes .....	1
Component Groups .....	2
Library GUI Configuration .....	5

### **Chapter 2**

#### **Component Entry**

Component Maintenance.....	7
Customer Part Numbers .....	9
Supplier Part Numbers .....	9
Wire Attributes .....	10
Multicore Wire Attributes.....	11
Device Details .....	12

### **Chapter 3**

#### **Component Extra Details**

Property Codes .....	14
User Properties for Type Codes .....	15
Copying Components .....	19
Deleting Components .....	20
Footprints .....	23

### **Chapter 4**

#### **Code Entry**

Color Codes .....	25
Material Codes .....	25
Component Type Codes .....	26
Customer Color Codes .....	26
Wire Sizes .....	27
Wire Insulation Thickness Records .....	28
Wire Group Definition .....	29
Exporting Codes .....	30

### **Chapter 5**

Manufacturing Components Customer and Supplier Information .....	30
Splices .....	32
Single Wire Termination Records .....	32
Multiple Wire Termination Records .....	33
Connector Attributes .....	33
Housing Definition .....	33
Wire Fits Cavity .....	35
Single and Multiple Wire Fits Cavity .....	35
