# Table of Contents

---

<b>Module 1</b>	
<b>Introduction to Eldo</b> .....	<b>21</b>
Objectives .....	21
Nanoelectronics Circuit Simulation Challenges .....	22
Analog Mixed-Signal Verification .....	23
Course Objectives .....	24
<b>Module 2</b>	
<b>Simulation Speed-up</b> .....	<b>27</b>
Objectives .....	27
Simulation of Large Circuits. ....	28
Allocate Correct Amount of Memory. ....	29
Number of Nodes and Components. ....	30
Collapse the intrinsic MOS Transistor Nodes .....	31
Options to Save Disk Space .....	33
Objectives .....	34
A New Technology .....	35
Average Speed-up (AMS2008.2) .....	36
Introduction to Multi-Threading Technology .....	37
Licensing for Multi-Threading .....	38
Eldo -use_proc .....	39
Multi-Threading Conditions .....	40
Multi-Threading on a Loaded Machine .....	41
Check Machine Configuration. ....	42
Importance of Cache memory .....	43
Eldo -cntthread .....	44
Example of a Quad-Core Processor. ....	45
Objectives .....	46
CPU Time versus Simulation Type .....	47
.MPRUN - Basic Vocabulary .....	48
.MPRUN - Mechanism .....	49
.MPRUN - Parallelization of Multi-Run Simulations .....	50
.MPRUN HOST .....	51
.MPRUN MAX_NBJOBS=val .....	52
Licensing Mechanism .....	53
.MPRUN NBLICENSES=val .....	54
Simulation Speed-Up and Other Interesting Features .....	55
EXTERNAL DISPATCHERS .....	56
Running a Single Run Simulation With LSF. ....	57
Running Multiple Run Simulation With LSF .....	58
Summary .....	59

<b>Module 3</b>	
<b>DC Convergence</b> .....	<b>61</b>
Objectives .....	61
DC Analysis .....	62
DC Partitioning .....	63
Newton-Raphson Algorithm .....	64
Solution of Nonlinear Network Equations.Iterations. ....	65
Newton-Raphson Convergence .....	66
Convergence Problems .....	67
Other Convergence Problems in Circuit Simulation .....	69
Other Convergence Problems .....	70
Objectives .....	72
DC Convergence Aid Algorithms .....	73
DC Convergence Aid Mechanisms .....	74
GMIN Stepping .....	75
[Simplified] DC Ramping .....	76
[Simplified] Transient Ramping .....	77
[Damped] Pseudo-Transient .....	78
Objectives .....	79
Improve DC Convergence .....	80
.IC Command. ....	81
.GUESS Command .....	82
.NODESET Command. ....	83
.NODESET is recommended. ....	84
Objectives .....	85
Saving Simulation State. ....	86
.SAVE Command .....	87
Loading Simulation Information .....	89
Save and Restart Example .....	90
Objectives .....	91
Solving DC Convergence Problems .....	92
Check for Circuit Connectivity Problems .....	94
Multiple DC Operating Points .....	95
To Keep in Mind .....	96
<b>Module 4</b>	
<b>Simulation Technology</b> .....	<b>97</b>
Objectives .....	97
Eldo Classic Solution Overview .....	98
Find the Solution of a DAE System. ....	99
Integration Algorithms When Using Newton .....	100
Backward Euler .....	101
TRAP. ....	102
GEAR. ....	103
Global Tuning of Accuracy - EPS .....	104
EPS values .....	105
More Accuracy Control Parameters. ....	106
What is Local Truncation Error (LTE)? .....	107

## Table of Contents

---

What is the Role of RELTOL,VNTOL,ABSTOL and CHGTOL? .....	108
Changing Accuracy During Simulation. ....	109
Optimize Performance/ Accuracy Compromise .....	111
Digital Cell Characterization .....	112
New Algorithm for Digital Cell Characterization .....	113
.option DCC_tuning Syntax. ....	114
Objectives .....	115
Classical Approaches to Large-Scale Circuit Simulation .....	116
New Solution : Eldo Premier. ....	117
Premier Use Model Allows Quick Adoption. ....	118
Netlist Support .....	119
Monte Carlo in Premier – New in AMS11.2. ....	120
Frequency-Dependent Models in Premier .....	121
Unsupported Devices and Features .....	122
Eldo/ADMS Premier over Eldo/ADMS Classic .....	123
Eldo Premier Licensing in MT Context : Eldo Classic x2 .....	124
Accuracy .....	125
What Eldo Premier Does... and Does not do... .....	126
Capacity .....	127
Key Technology Concept: HR2. ....	128
Traditional Multi-Threading .....	129
HR2 Enabled Multi-Threading .....	130
HR2 : Linear Algebra Revisited .....	131
Traditional Interpreted Code .....	132
HR2 : Using Compiled Optimized Code .....	133
Using Eldo Classic DC Solution .....	134
Summary .....	135
<b>Module 5</b>	
<b>Post Layout .....</b>	<b>137</b>
Objectives .....	137
Design Challenges Due to Nanometer Effects. ....	138
The Goal of Extraction .....	139
Introduction to Post Layout Simulation. ....	140
How Extraction Helps .....	141
Objectives .....	142
What Is a Net After Extraction? .....	143
Coupling Further Complicates Reduction .....	144
Distributed Resistance .....	145
Coupling Plus Intrinsic .....	146
Resistance, Capacitance, and Coupled Cap .....	147
Objectives .....	148
Why is Reduction of Parasitic Elements Important? .....	149
No Convergence During Post-Layout Simulation .....	150
Advantages With Reduction .....	151
.REDUCE Command. ....	152
Reduction Results Example .....	154
.REDUCE FREQUENCY .....	155

How to Control the Reduction? .....	156
.REDUCE TUNING .....	157
Possible Conflicts with Eldo option.....	158
Reduction Restrictions.....	159
Objectives .....	160
DSPF File Overview .....	161
DSPF File Net Parasitic Section .....	162
Parasitics Data in Eldo.....	163
Extracting Multiple Parasitic Netlists From One Parasitics Database.....	164
Signal Integrity Analysis - RCC .....	165
Timing Analysis- RC.....	166
Noise Analysis- C .....	167
Power Analysis - R .....	168
Remove Components by Threshold Setting .....	169
Controlling the Effects of Reduction.....	171
Objectives .....	172
Outputs From Extraction .....	173
What is a MOS After Physical Layout and Extraction .....	174
Schematic Mode .....	175
Layout Mode .....	177
Mixed Mode.....	179
Handling of Multi-Finger Devices.....	180
Multi Simulations Are Supported .....	181
How to Deal With Non-Existing Nodes .....	182
Summary .....	183
<b>Module 6</b>	
<b>EXTRACT Post-Processing.....</b>	<b>185</b>
Objectives .....	185
Eldo Post-Processing Capabilities .....	186
EXTRACT Definition - LABEL .....	187
EXTRACT Definition - Expression .....	188
Wave Definition With .DEFWAVE .....	189
Simple Wave Expression.....	190
EXTRACT Outputs .....	191
Objectives .....	192
DC Extract Generalities.....	193
PVAL - Extracting Global Parameter Value .....	194
MODPAR - Extracting Model Parameter Value .....	195
Extract Device and Model Parameters.....	196
AC Extract Examples.....	197
Transient Extraction Language (TEL) Functions .....	198
General Extraction Language Functions (GEL) .....	199
TEL versus GEL Summary .....	200
XYCOND Function (GEL) .....	201
GEL: MIN and MAX Argument Usage .....	202
TEL: BEFORE, AFTER, OCCUR Examples .....	203
TEL versus GEL Example.....	204

## Table of Contents

---

Objectives .....	205
Macro Definition and Use .....	206
Using Macros for .DEFWAVE and Controlled Sources .....	207
MACRO Arguments .....	208
Error Message Example .....	209
Objectives .....	210
Errors in Extract Statements .....	211
Flow Without Eldo -Extract Command .....	212
Flow With Eldo -Extract Command .....	213
Eldo -Extract Syntax .....	214
Objectives .....	215
Removing a .EXTRACT From a .ALTER .....	216
Sweep Analysis Generalities .....	217
Sweep Analysis Example .....	219
Using VECT to Extract All Values of an Expression .....	221
.EXTRACT VECT Example .....	222
Objectives .....	223
Safe Operating Area (SOA) .....	224
Simple Example .....	225
Check Syntax for Devices .....	226
SOA Device Examples .....	227
Check Syntax for Models .....	229
Checkable Parameters .....	230
Check Syntax for Expressions .....	231
SOA Identifier Format .....	232
Conditions in .SETSOA .....	233
SOA IF/ELSE Examples .....	234
Reduce the CPU Time .....	235
.CHECKSOA Other Syntax .....	237
Summary .....	238
<b>Module 7</b>	
<b>Tcl Post- Processing .....</b>	<b>239</b>
Objectives .....	239
Extending Eldo With Tcl .....	240
Tcl Usage - Macros versus Post-Processing .....	241
.USE_TCL Command .....	242
Creating Macro-Like UDFs With Tcl .....	243
More Complex Macro-Like Example: Sample and Hold .....	245
.CALL_TCL .....	246
.TCL_WAVE .....	247
Specifics of Tcl UDFs Called With .CALL_TCL .....	248
evalExpr Function .....	250
defineVec and display Functions .....	251
PPL Predefined Function Library .....	252
Tcl Example Using Information Commands and Loops .....	253
wfc Function .....	254
More Complex Example of wfc Usage .....	255

---

Documentation of Tcl Usage .....	256
<b>Module 8</b>	
<b>Eldo Control Language Post- Processing .....</b>	<b>257</b>
Objectives .....	257
Eldo Control Language - ECL .....	258
ECL Advantages .....	259
ECL Limitations .....	260
ECL Overview .....	261
Objectives .....	262
Testbench .....	263
Testbench definition and instantiation .....	264
Task definition and instantiation .....	265
Example of a Recursive Task .....	266
Fundamental Building Blocks of ECL .....	267
ECL Building Blocks: Comments, Line Breaks .....	268
ECL Building Blocks: Variables .....	269
ECL Building Block: Variables – Complex numbers, Strings .....	271
ECL Building Blocks: Variables – Waveform .....	272
ECL Building Blocks: Variables – File .....	273
ECL Building Blocks: Variables - Vector .....	274
ECL Building Blocks: Constants .....	280
ECL Building Blocks - Flow Control .....	281
ECL Building Blocks: Flow Control – if/else/endif .....	282
ECL Building Blocks: Flow Control – Incr. Step .....	283
ECL Building Blocks: Flow Control – Linear Step .....	284
ECL Building Blocks: Flow Control – Log Step .....	285
ECL Building Blocks: Flow Control – List Step .....	286
ECL Building Blocks: Flow Control – While, For .....	287
ECL Building Blocks: Function .....	288
Defining and Running Simulations .....	289
Simulation Example .....	290
Simulation Results .....	291
Simulation Result Files .....	292
Collecting Simulation Results .....	293
Library of Functions .....	294
Objectives .....	295
How Does .step Output Look Like? .....	296
Eldo CL Netlist - Testbench .....	297
Eldo CL Netlist – Real Task .....	298
Eldo CL Output .....	299
Objectives .....	300
Library of Functions .....	301
Advanced Simulation Options .....	302
ECL Grammar Description .....	303
Debug MODE .....	304
Summary .....	305

## Table of Contents

---

### Module 9

<b>New Monte Carlo</b> .....	<b>307</b>
Objectives .....	307
Need for Statistical Simulations .....	308
Monte Carlo Analysis Principles .....	309
Definition of Parameters Variation With .MODEL .....	310
DEV/LOT Correlation .....	311
Distribution Types .....	312
User-Defined Distribution .....	313
Model Parameter Defined With .MODEL and .MCMOD .....	314
Monte Carlo Parameter Defined With .MODEL and .PARAM .....	315
Correlation Coefficient Between Parameters .....	316
.CORREL Example .....	317
Binning Parameter .....	318
Module Objectives .....	319
Simple Monte Carlo Example .....	320
Monte Carlo Outputs .....	321
Bootstrap Confidence .....	322
Sensitivity Analysis .....	323
Sensitivity Analysis Concept .....	324
Large Scale Screening .....	325
Sensitivity Analysis Results .....	327
PDF and CDF Curves Available Automatically .....	328
Histogram Available Automatically .....	329
Module Objectives .....	330
Histogram Expansion With .MC NBBINS=val .....	331
Histogram Expansion With .MC MAXABSBIN or MAXRELBIN .....	332
Histogram With Untypical Samples .....	333
Accurate Histogram With .MC SIGBIN= val .....	334
Module Objectives .....	335
How Many MC Runs? .....	336
Incremental Monte Carlo .....	337
Display Evolution of Monte Carlo Run .....	338
Incremental Monte Carlo Syntax .....	339
Save/Restart Mechanism .....	340
Save/Restart Example .....	341
Module Objectives .....	342
Monte Carlo Convergence Monitoring .....	343
Settling Algorithm Concept .....	344
Settling Example .....	345
Complete Settling Syntax .....	346
Settling Algorithm Tuning .....	347
Confidence Algorithm Concept .....	348
Confidence Example .....	349
Complete Confidence Syntax .....	350
Confidence Algorithm Tuning .....	351
Results of the Provided Example .....	352
Module Objectives .....	353

.MC Sampling Parameters .....	354
Standard Monte Carlo .....	355
Smart Monte Carlo .....	356
Quasi Monte Carlo Method .....	357
Latin Hypercube Sampling .....	358
Module Objectives .....	359
Lower/Upper Specification .....	360
Specific Extract Functions .....	361
ICARLO and NBCARLO Specifications .....	362
Monte Carlo Index .....	363
Monte Carlo Helpful Options .....	365
Help to Solve Errors in Extract Statements .....	366
Nothing is as Easy as it Looks .....	367
Summary .....	368
Two-Stage Low Pass Filter .....	369
<b>Module 10</b>	
<b>Design Sensitivity and Statistics .....</b>	<b>371</b>
Objectives .....	371
Nothing is as Easy as it Looks .....	372
Sensitivity Analysis Principles .....	373
Important Parameters .....	374
.WCASE .....	375
.DC MISMATCH .....	376
.SENSPARAM .....	377
.SENS .....	378
.SENS AC .....	379
.SENS TRAN .....	380
Objectives .....	381
Sensitivity Analysis of Sub-Circuit Parameters (.SENSPARAM) .....	382
.SENSPARAM Example .....	383
DC Mismatch Definition .....	384
.DCMISMATCH Results .....	385
DC Sensitivity Analysis Definition .....	386
.SENS I(VDD) Results .....	387
AC Sensitivity Analysis (.SENSAC) .....	388
Simple Example .....	389
.SENSAC v(out) freq=1e6,10e6 Results .....	390
Transient Sensitivity Analysis (.SENS TRAN) .....	391
Worst Case Definition .....	393
.WCASE Results .....	394
Objectives .....	395
Screening Analysis .....	396
Parameter Screening - .DEX and .PARAMDEX .....	397
.DEX DESIGN Parameter .....	398
.DEX .....	399
.PARAMDEX .....	400
DEX Mean Table Example .....	402

## Table of Contents

---

Summary .....	403
<b>Module 11</b>	
<b>Optimization .....</b>	<b>405</b>
Objectives .....	405
Why Optimization May be Needed .....	406
Eldo Optimization .....	407
Optimization Process .....	408
Netlist Example .....	409
How to Start .....	410
Module Objectives .....	411
How to Get an Appropriate MODEL .....	412
Defining Parameters .....	413
Discretization of Final Parameter .....	414
Parameter Types .....	415
Scaling Variables – Automatic Scaling .....	416
Scaling Variables – Manual Scaling .....	417
Defining Tracking Parameters With .CORREL EXPR .....	418
What Is a Target? .....	419
Defining Targets .....	420
.Objective Syntax .....	421
Defining an Optimization .....	423
Optimization Algorithm .....	424
Defining an Optimization .....	425
Optimizing Noise Figure Example .....	426
Optimizing Input Match Example .....	427
Multi-Point Objectives “Curve Fitting” .....	428
Module Objectives .....	429
Global and Local Solution .....	430
.otm File Overview .....	431
How to Access to Other Parts of .otm File .....	432
viewotm -l 1 -f <file_name>.otm .....	433
How to Plot the Results .....	439
Reuse the Optimized Values .....	440
Other Options .....	441
Module Objectives .....	442
.OPTIMIZE Method .....	443
.OPTIMIZE Method Example .....	445
Bisection versus Secant Example .....	446
Bisection Example .....	447
Secant Example .....	448
Bisection versus Secant .....	449
Bisection versus Secant Illustrated .....	450
Summary .....	451
<b>Module 12</b>	
<b>Reliability Analysis (UDRM) .....</b>	<b>453</b>
Objectives .....	453

Aging Reliability: Industry-Wide Issue	454
What Is Aging?	455
Hot Carrier Injection - NMOS	456
Bias Temperature Instability - PMOS	457
Introduction to Reliability Analysis	458
What Does the Analysis Provide?	459
Verification Flow Incorporating Reliability	460
Flow Description	461
Module Objectives	462
New Eldo Functions and Commands	463
Using Reliability Analysis in Eldo	464
.AGEMODEL Parameters	465
.AGEMODEL versus .MODEL	466
Main .AGE Parameters	467
Reliability Repetitive Scheme Flow Chart	468
Monitoring Outputs	469
Digital (Ring Oscillator) Example	471
Additional Features	472
Sorted Degradation Summary	473
Aging Sensitivity	474
Module Objectives	475
Implementation	476
Stress Model	477
HC Stress Models	478
NBTI Stress Models	479
Updated Models	480
HC Update Models	481
NBTI Update Models	482
UDRM Interface	483
First User-Defined Function	484
Next User-Defined Functions	485
Step 1 - Run a Fresh Transient Simulation	486
Step 2 - Calculate the Stress of Each Device	487
Step 3 - Calculate the Delta Change	488
Step 4 - Run the Final Degraded Simulation	489
Interface Functions	490
Hot Carrier - Stress Model Template	491
Device Model Saved Quantities	492
Hot Carrier - Update Model Template	493
Compiling a Reliability Model	494
Model Debugging Hints	495
Summary - Reliability Analysis in Eldo	496
Summary	497
<b>Module 13</b>	
<b>Pole Zero and FFT</b>	<b>499</b>
Objectives	499
Why a Pole-Zero (PZ) Analysis May be Needed	500

## Table of Contents

---

Interactive Post Processor Command .....	501
Example Question Asked by pz Command .....	502
Pole-Zero .mpz Output File .....	503
How to Get an Accurate Model .....	504
Limitations of the Post Processors .....	506
Module Objectives .....	507
Digital Signal Processing Topics .....	508
Simulation Parameters for FFT .....	509
Simulation Parameters for FFT Example .....	511
FFT Inside ELDO .....	512
FFT Example .....	517
FFT Waveforms .....	518
Digital Signal Processing (DSP) Inside ELDO .....	519
PSD Models .....	520
DSP in EZwave .....	521
PPL Library in ELDO .....	522
<b>Module 14</b>	
<b>Scattering Parameters .....</b>	<b>525</b>
Objectives .....	525
Scattering Parameters Generalities .....	526
S-Parameter Extraction Definition .....	527
S-Parameter Result Output .....	528
S-Parameter Extraction Results (AC Analysis) .....	530
Module Objectives .....	531
Specific S-Parameter Measurements .....	532
Module Objectives .....	540
How to Reuse an Existing S-Parameter File .....	541
S Parameters Robustified .....	544
Module Objectives .....	546
Mixed-Mode S-Parameters Overview .....	547
Mixed-Mode S-Parameter Extraction .....	550
Mixed-Mode S-Parameters Simulation .....	551
<b>Module 15</b>	
<b>Noise Analyses .....</b>	<b>555</b>
Objectives .....	555
Definition of Input Noise .....	556
Noise Sources .....	557
AC and Transient Noise Source Examples .....	559
Creating a Noise Source From RMS or Peak-to-Peak Specs .....	560
Noise Models for Resistors, Diodes, and BJTs .....	561
Noise Model for MOS Transistors .....	562
Specifying Eldo Noise Model for BSIM3v3 MOS .....	563
Module Objectives .....	564
AC Noise Analysis .....	565
AC Noise Analysis Definition .....	566
AC Noise Output Results .....	567

AC Noise Results (.chi file) . . . . .	568
AC Noise Results . . . . .	569
Formatting AC Noise Results . . . . .	570
AC Spot Noise Figure (SNF) Measurement . . . . .	572
Module Objectives . . . . .	573
<b>Module 16</b>	
<b>Advanced Noise Analyses . . . . .</b>	<b>575</b>
Objectives . . . . .	575
Analyse Noise Performance . . . . .	576
AC Noise Analysis Overview . . . . .	577
SSTNOISE Analysis Overview . . . . .	578
Why a Transient Noise Analysis? . . . . .	579
Objectives . . . . .	580
Transient Noise Algorithm . . . . .	581
NOISETRAN Analysis on Amplifier . . . . .	582
Noisetran Result . . . . .	583
Transient Noise Analysis Results . . . . .	584
Comparing .NOISETRAN, .NOISE and .SSTNOISE Results . . . . .	585
AC NOISE Analysis on Amplifier . . . . .	586
SSTNOISE Analysis on Amplifier . . . . .	588
Which Settings are Important? . . . . .	589
Objectives . . . . .	590
TSTOP Value From the .TRAN Command . . . . .	591
Transient Noise Analysis Syntax . . . . .	592
NBRUN – Number of Runs For RMS Noise Output . . . . .	593
Limitations of Single Run Algorithm (When MRUN is not Used) . . . . .	594
MRUN – Use Multiple Runs Algorithm . . . . .	595
Extract Noise Commands . . . . .	596
FMAX: Main Factor to Increase Accuracy . . . . .	597
FMIN : Algorithms Selector . . . . .	598
Original Transient Noise Algorithm (FMIN > 0) . . . . .	600
Transient Noise Algorithm (FMIN > 0) White Noise With NBF=3 and NBF=50 . . . . .	601
Speeding Up Transient Noise Analysis . . . . .	602
Objectives . . . . .	603
Measuring Jitter With .NOISETRAN . . . . .	604
Period Jitter Definition . . . . .	605
Cycle to Cycle Jitter Definition . . . . .	606
Long Term Jitter Definition . . . . .	607
Time Interval Error (TIE) Definition . . . . .	608
Measuring Jitter From .NOISETRAN Results in EZwave . . . . .	609
Jitter Measurement - Example #1 . . . . .	610
Jitter Measurement - Example #2 – Step 1 . . . . .	612
Jitter Measurement - Example #2 – Step 2 . . . . .	613
.SSTNOISE Measurement . . . . .	616
Long Term Jitter Measurement in EZwave vs. LT_JITTER from .SSTNOISE Analysis . . . . .	617
Objectives . . . . .	618
Measuring PLL Jitter Through .SSTNOISE . . . . .	619

## Table of Contents

---

Measuring PLL Phase Noise Spectrum Through .NOISETRAN .....	620
Transient Simulation Until PLL Steady-State .....	621
Transient Noise Simulation at Steady-State .....	622
PHNOISE Results: .NOISETRAN vs. .SSTNOISE .....	623
Transient Noise in Eldo Premier .....	624
Conclusion .....	625
Summary .....	627
<b>Module 17</b>	
<b>Conclusion .....</b>	<b>629</b>
Objectives .....	629
Documentation .....	630
What is New in InfoHub V3? .....	631
Improved Organization .....	632
Improved Search Results .....	633
Stemming Support .....	634
Mentor Graphics Support .....	635
Prompt to Search SupportNet .....	636
First Supportnet Visit: Login or Signup .....	637
On Line Support Site .....	638
AMS Releases .....	639
Stable Production Branch .....	640
Advanced Branch .....	641
Benefits .....	642
What About the Next Release? .....	643
<b>Appendix A</b>	
<b>Eldo Basics .....</b>	<b>645</b>
Objectives .....	645
Basic Environment Setup .....	646
How to Start Eldo .....	647
Netlist Content .....	650
Troubleshooting Hints .....	651
.OPTION Command .....	652
How to Find an Option .....	653
ELDO — Example of a .chi File .....	654
Optional Command Lines .....	662
Online Help .....	663
Design Flow .....	664
Framework for Standalone Usage .....	665
<b>Appendix B</b>	
<b>Eldo Devices and Sub-Circuits .....</b>	<b>667</b>
Objectives .....	667
Definitions .....	668
Eldo - Example of a .cir File .....	670
Objectives .....	672
Resistor R .....	673

R: Value Functional Description: VALUE={EXPR} .....	674
R: Other Value Description .....	675
R: Temperature and Temperature-Dependent Parameters .....	676
R: Other Optional Instance Parameters .....	677
Capacitor C .....	678
Inductor L .....	679
Objectives .....	680
Junction Diode D .....	681
Bipolar Junction Transistor (BJT) Q .....	682
Metal Oxide Semiconductor Field Effect Transistor (MOSFET) M .....	683
Objectives .....	685
Sub-Circuit Definition - .SUBCKT .....	686
Sub-Circuit Instantiation - X .....	687
Netlist Example .....	689
Automatic Merging of Devices in Parallel .....	690
Objectives .....	691
List of Available Macromodels .....	692
Example of Macromodel Usage in Eldo - VSWITCH .....	693
Objectives .....	694
Using Behavioral Verilog-A Models Within Eldo .....	695
Use of a Verilog-A Model in a Netlist .....	696
Example - Verilog-A Model in a Netlist .....	697
Hierarchical Verilog-A Model Example .....	698
Verilog-A Model Example .....	699
Generic and Param Usage .....	700
Compilation .....	701
Case of Compiled Library Not in the Current Directory .....	702
Starting With Verilog-A .....	703
.HDL Command for VerilogA as X-Statements .....	704
Devices - Quiz .....	705
Quiz Netlist (Devices Only) .....	706
<b>Appendix C</b>	
<b>Basic Analyses .....</b>	<b>707</b>
Objectives .....	707
.DC Analysis .....	708
DC Operating Point (.chi) .....	709
.OP Analysis .....	710
Operating Point Information (.chi) .....	711
Differences Between DC and OP Analyses .....	712
.TRAN Analysis .....	713
.AC Analysis .....	714
Objectives .....	715
.DC Sweeping .....	716
.OP During .DC Sweep or .TRAN .....	717
.TRAN Syntax .....	718
.AC Syntax .....	719
Objectives .....	720

## Table of Contents

---

.PLOT and .PRINT .....	721
.PROBE .....	723
Quizz DC .....	725
<b>Appendix D</b>	
<b>Eldo Sources and Stimuli .....</b>	<b>727</b>
Objectives .....	727
Introduction .....	728
First Letter Used to Instanciate a Source .....	729
Eldo Sources .....	730
Independent Sources — V, I .....	731
Time Dependent Functions — PULSE .....	732
Time Dependent Functions — PATTERN .....	733
Time Dependent Functions — PWL (Piece Wise Linear) .....	735
Time Dependent Functions — PWL .....	736
Time Dependent Functions — SIN (Sine Function) .....	737
Time Dependent Functions — EXP (Exponential) .....	738
Time/Frequency Dependent Functions — FOUR (Fourier) .....	739
Objectives .....	740
Piecewise Linear Source — .CHRENT Command .....	741
Trapezoidal Pulse With Bit Pattern Function — PBIT .....	742
Exponential Pulse With Bit Pattern Function — EBIT .....	744
Time Dependent Functions — AM (Amplitude Modulation) .....	746
Time Dependent Functions — SFFM (Single Frequency FM) .....	747
Linear Voltage Controlled Sources — E, G .....	748
Linear Current Controlled Sources — F, H .....	749
<b>Appendix E</b>	
<b>EZwave Major Features .....</b>	<b>751</b>
Objectives .....	751
Basic EZwave Features .....	752
Advanced EZwave Capabilities .....	753
EZwave - Elements of the Interface .....	754
Joint Waveform Database (JWDB) .....	755
.wdb and .swd Files .....	756
Invoke EZwave .....	757
EZwave Integration in Artist Link .....	758
How to Start EZwave in Artist Link .....	759
Memory Shortage Detection .....	760
Out of Memory .....	761
Allocate Less Memory .....	762
Module Objectives .....	763
Toolbar .....	764
Mouse Strokes .....	765
Find Button .....	766
The Find Capability for Plotted Waveforms .....	767
Waveform List .....	768
EZwave - Additional Tools .....	769

Module Objectives	770
Measurement Tool	771
Module Objectives	773
Waveform Calculator	774
Using the Waveform Calculator	775
Module Objectives	778
Waveform Compare Tool	779
Waveform Compare Wizard	780
Comparison Method Selection	781
Viewing Waveform Comparison Results	782
Module Objectives	783
File > Save Menu	784
Tcl File Example	785
Getting Help	786
<b>Appendix F</b>	
<b>Eldo Device Models</b>	<b>787</b>
Objectives	787
Model Libraries Introduction	788
Model Library Syntax	789
MOS Model - Clipping	790
MOS Model - Binning	791
More and More Effects are Included	793
Surface Potential Models	794
Model File Selection	795
Module Objectives	796
Library Overview	797
.INCLUDE Command	798
.INCLUDE and Monte Carlo	799
Simple Definition With .LIB	800
Library Definition With .LIB KEY	802
Library Definition With .ADDLIB	803
Delete Library With .DEL	805
Module Objectives	806
HSPICE Compatibility	807
HSPICE© Compatibility Mode	808
Device Models Compatibility	809
Spectre Compatibility	810
Module Objectives	811
Basic Library Encryption	812
Advanced Library Encryption	813
IP Protection for the Foundry	814
IP Protection for the User	815
<b>Appendix G</b>	
<b>Basic Post-Processing</b>	<b>817</b>
Objectives	817
Eldo Post-Processing Capabilities	818

## Table of Contents

---

Wave Definition . . . . .	819
Simple Wave Expression . . . . .	820
Objectives . . . . .	821
How to Define Simulation Measurement . . . . .	822
Extract Definition . . . . .	823
EXTRACT Outputs . . . . .	825
Objectives . . . . .	828
DC Extract Generalities . . . . .	829
Plot and Print Quantities . . . . .	830
PVAL – Extracting Global Parameter Value . . . . .	831
EVAL – Extracting Instance Parameter Value . . . . .	832
MODPAR – Extracting Model Parameter Value . . . . .	833
OPMODE, POW and POWER Example . . . . .	834
Objectives . . . . .	835
Transient Extraction Language (TEL) Functions . . . . .	836
General Extraction Language Functions (GEL) . . . . .	837
Transient versus General Extraction Languages . . . . .	838
MIN and MAX Argument Usage . . . . .	839
XUP, XDOWN, XTHRES Usage . . . . .	840
YVAL Usage . . . . .	841
Objectives . . . . .	842
Errors in Extract Statements . . . . .	843
Flow Without Eldo -extract Command . . . . .	844
Flow With Eldo -extract Command . . . . .	845
Eldo –extract Syntax . . . . .	846
Objectives . . . . .	847
.MEAS Generalities . . . . .	848
Fundamental Measurements With .meas . . . . .	849
One Possible .MEAS Definition . . . . .	850
A Fall/Rise Example . . . . .	851
Quiz Basic Post-Processing . . . . .	852
<b>Appendix H</b>	
<b>Major Questa ADMS, ADiT and Eldo RF Capabilities . . . . .</b>	<b>853</b>
Objectives . . . . .	853
Overview of Questa ADMS . . . . .	854
Overview of Questa ADMS Integration . . . . .	855
First Run Examples . . . . .	856
Reshaped Manuals in AMS2010.1 Release . . . . .	857
Objectives . . . . .	858
ADiT – Mixed-Signal Targeted Fast-SPICE . . . . .	859
ADiT Technology - Overview . . . . .	860
ADiT Major Features . . . . .	861
First Run Examples . . . . .	862
Objectives . . . . .	863
Overview of ELDO RF . . . . .	864
First Run Examples . . . . .	865
